## REGISTER 360 WORKFLOW – RTC360

1. Open **Cyclone Register 360 Software**.
2. Click **Create New Project**.
3. **Name** the project and click ok.
4. Click the folder that says **None**.
5. Open File explorer and open the **thumb drive folder**.
6. Open the **RTC360 folder**.
7. **Drag and drop** a project into Drag files here in **Cyclone Register 360**.
8. Make sure **Pre-Registered** and **Import Images** boxes are checked and click **Import**.
9. Click on **Optimize Bundle** and click **ok** when it's done.
10. Click on the **Finalize tab** at the top.
11. Click on the **small Accept button** at the bottom then click on the Red Accept button.
12. Click on the **Publish Options** tab at the top right.
13. Check the box for **RCP (Cloud)**
14. **Select the folder** where you want the files exported to and **name the file**. (Do not use any kind of special characters. It will create problems with the data after export.)
15. Check the box for **Setups** under the **RCP (Cloud)** and then click **publish**.
